**Q-Man – Night Glow – Submix032**

Time has changed: today music can be simply spread through Internet. There's no need to run our own label and to find a distributor anymore. More and more net labels are launched and they bring more and more high quality music as free download. And now they don't only give EPs or albums, some of them also offer mixes that are exclusively produced using tracks coming from net labels. That's what is doing Subsource which has just put online its 32nd mix of that kind! It features 15 unknown artists (only two or three of them have previously released music on vinyl or CD) with 15 tracks which are as good as what can be found at your favorite record dealer. Q-Man aka Felix Jahn delivers an excellent 72 minutes long mix where we find electro, electronica, atmospheric & ambient parts, dubby, deep & minimal techno / house. A really fine selection containing many jewels and sweet, beautiful & captivating parts that deserves to be listened timeless! That's it, simply download this mix and follow all links given in the tracklisting to discover all these artists and net labels.
